## UK Renal Data Collaboration

16 Oct 2015

UK Renal IT Companies

Dear Colleagues,

### UKRDC xml schema – pilot sites

The UKRDC draft xml scheme for electronic data transfer has now been published.

see UKRDC <https://www.ukrdc.org/>

and the link to the GitHub at <http://docs.ukrdc.org/>

Comments on this are welcome and should be sent by 13 November 2015 to

[George.Swinnerton@renalregistry.nhs.uk](mailto:George.Swinnerton@renalregistry.nhs.uk)

For each of the major UK Renal IT suppliers, we would now like to identify renal units that will act as pilot sites to set up and test the schema with a view to adopting it for our work throughout the UK.

Thereafter, we will stop using the current disparate data transfer mechanisms.

We hope that the new system will be fast, flexible and eventually two way.

Could we arrange a phone call to discuss how this work might be undertaken and funded? Please contact [keith.simpson@nhs.net](mailto:keith.simpson@nhs.net) to plan the call.

Kind regards

Dr Afzal Chaudhry
